## VISION

For PEB Steel to be recognized as the bench mark in the steel buildings Industry. This will be accomplished through its **Product Perfection, Engineering Excellence and the best customer services** in the industry.

## MISSION

- To bring the PEB technology to where it is most needed in the world, and help others "build a better life", through industrialization.
- To (jointly) build high capacity, efficient & cost effective steel factories for speedy delivery and for benefiting from "economies of large scale".
- To design and fabricate safe and technologically advanced buildings.
- To offer customers versatility in design & fabrication to meet their exact building requirements.
- To offer customer services second to none in the industry.

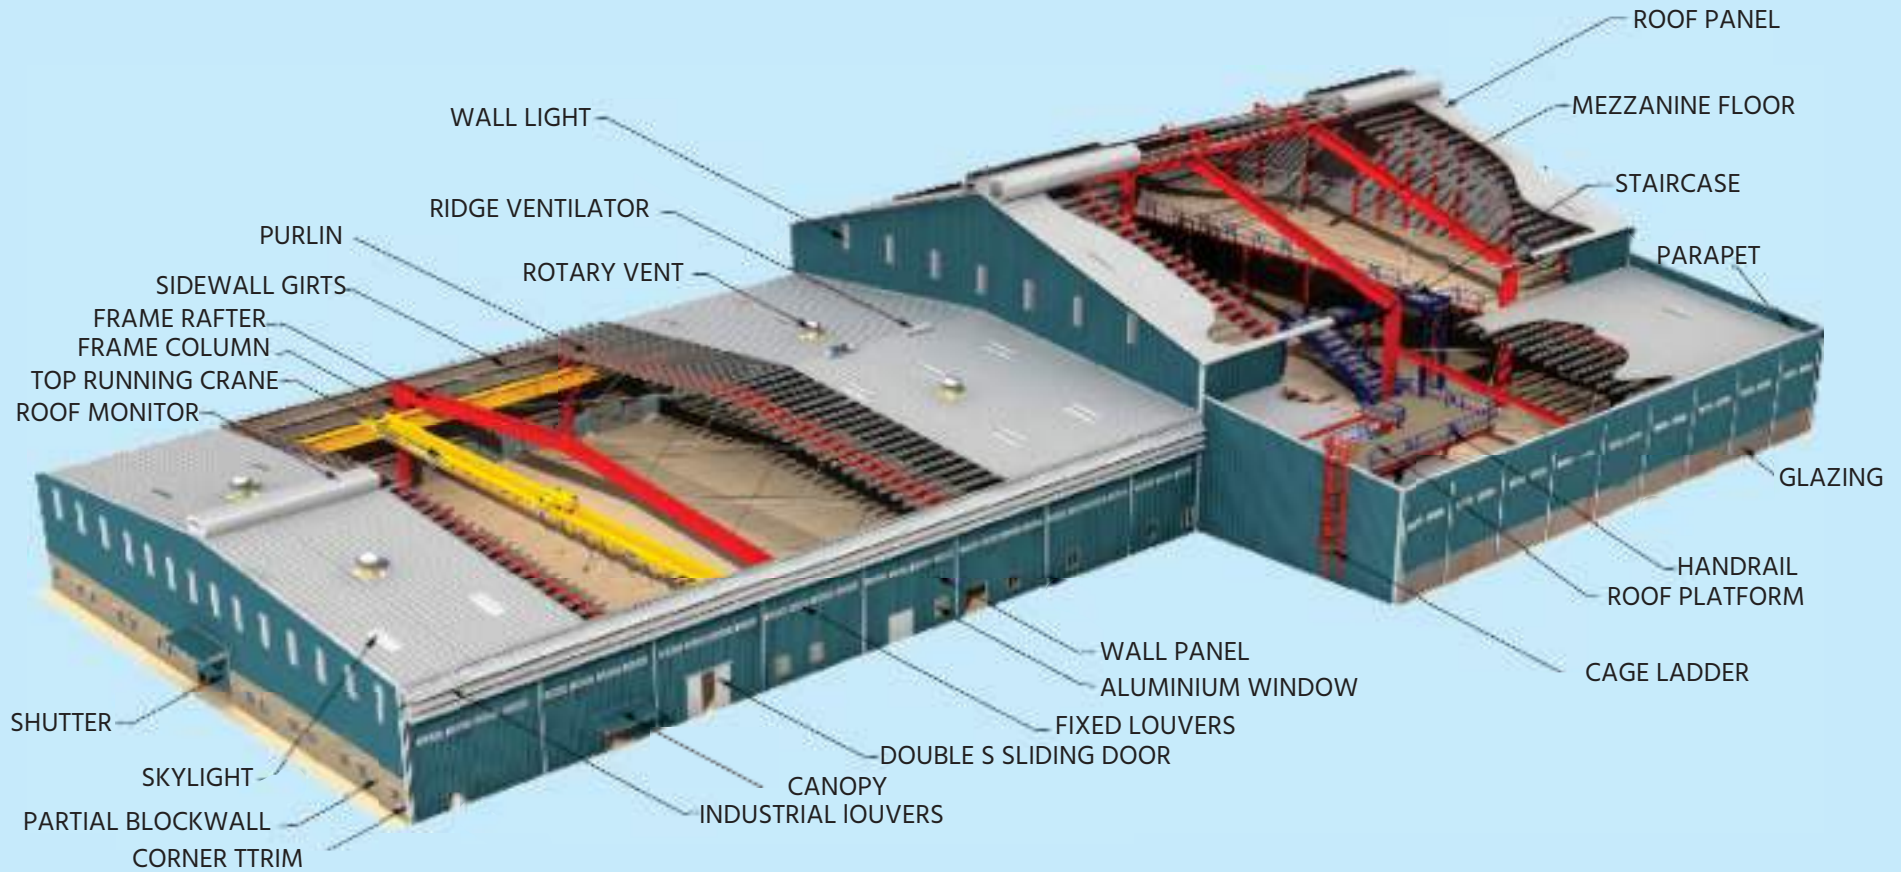

## VALUES

- Be a Leader and not a follower.
- Share Knowledge and Success with others.
- Forge local alliances wherever you go.
- Apply only the Latest design and buildings codes.
- Continually improve our products.
- Customer service makes all the difference: customers are lifetime partners, always seek a Win-Win solution.
- The longest journey begins with the smallest step, so begin with the end in mind. and focus on the long term, not just the short term.

## Our Strength

- Very Economical
- Quick Delivery with express installation
- Low maintenance
- Wide spans and high heights
- Design and architectural flexibility
- Environmentally friendly
- Water and earthquake resistant
